WHAT'S NEW?

The Build Your English application is almost done. The project partnership plans to conduct BYE workshops and test courses during December 2013 and January 2014.

Workshops will be a great opportunity to present to potential users of the BYE application, and give invited persons the opportunity to participate in test trainings. They will evaluate the prepared programme on the basis of an evaluation questionnaire.

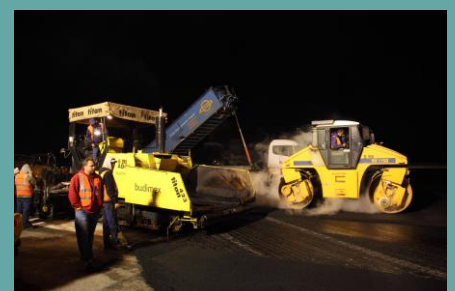

In addition, we would like to check if the BYE application contributes to the acquisition of greater knowledge of technical English language. In order to do this each participant must fill in two identical tests - one before starting work on the application and one upon completion of the use of the application.

These three forms will be given to the participants during the workshops. There will be the possibility to join test courses via the internet. Mailing will be done to potential beneficiaries in each partner country.

BUILD YOUR ENGLISH SOFTWARE

The BUILD YOUR ENGLISH software has been developed and it looks perfect. After almost two years, it has been developed as a transparent English learning tool. The application was developed according to the potential beneficiaries' needs. The reliable Build Your English software allows access to the Build Your English application through a user-friendly layout.

Additional options such as a glossary, instruction movies, grammar tips, additional exercises for teachers and quizzes were added to the programme contents.

The content of the lessons and examples have been created by the project partners. Each partner is responsible for one module.

- Module 1 Basic construction elements – ECOMEN
- Module 2 Construction site facilities – PZPB
- Module 3 Communication and employment – EMI
- Module 4 Technical documentation and H&S terms – SGG/PZPB

Graphic content like pictures and short movies have been obtained thanks to construction companies and other companies related to the construction sector. It was possible to take pictures and shoot the short movies on building sites and on companies' facilities.

Coventry University shot short instruction movies according to the scripts prepared for the BYE application purpose.

OTHER RELATED PROJECTS

Qualification, ICT and environmental culture in the construction sector.

517841-LLP-1-2011-1-ES-LEONARDO-LMP

e-SKILL is a project funded under the Leonardo da Vinci Programme of the European Commission aimed at supporting low and non-qualified construction workers to improve their green skills and to get a formal recognition throughout Europe. www.e-skill.eu.

BUILD UP Skills is a new strategic initiative under the Intelligent Energy Europe (IEE) programme (Calls for proposals 2011-2013) to boost continuing or further education and training of **craftsmen and other on-site construction workers and systems installers in the building sector**. The final aim is to increase the number of qualified workers across Europe to deliver renovations offering a high energy performance as well as new, nearly zero-energy buildings. The initiative addresses skills in relation to energy efficiency and renewables in all types of buildings. <http://www.buildupskills.eu/>

PROJECT PARTNERS

Project events:

An additional meeting has been set up in Cracow on 9 -10 January 2014.

The final conference has been set up in Warsaw on 12 – 13 February 2014.
